

Welcome to the historic City of Bath for what promises to be an excellent Spring Scientific Meeting for the Society. The theme of the meeting, to be held in the magnificent Assembly Rooms, is to explore advances in surgical/dental techniques and materials to improve predictably dental and facial aesthetics and function. The Society is delighted that many outstanding clinicians from home and abroad have agreed to present and I would therefore strongly encourage you to join us in Bath and not let this opportunity pass by.

A carefully planned social programme includes a civic reception in the ancient Roman Baths followed by dinner, wine and entertainment in the elegant Georgian Pump Rooms (Black Tie). The historic City of Bath and its surrounds offer a perfect setting for accompanying persons and to perhaps extend your stay. I look forward to welcoming you in May.

Paul King  
President BSRD 2004-2005
